## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election without traverse of Group I, Claims 1-12, in Paper No. 9 is acknowledged.
2. Claims 13-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.  
Election was made **without** traverse in Paper No. 9.

### ***Priority***

3. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Canada on 6/15/2000. It is noted, however, that applicant has not filed a certified copy of the foreign application as required by 35 U.S.C. 119(b).

### ***Specification***

4. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

5. The abstract of the disclosure is objected to because it is too long. Correction is required.  
See MPEP § 608.01(b).

Art Unit: 1762

6. The disclosure is objected to because of the following informalities:

There is no brief description of Figs. 3 and 3A.

The specification also does not provide a detailed description of the Fig. 3A.

Appropriate correction is required.

#### *References Cited*

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Matheny teaches a method of applying drywall mud to drywall tape by running the tape through first and second slot in a container containing the drywall mud. However, Matheny does not teach the claimed provision of attaching the strip of material to the tape being substantially longer than the distance between the first and second slots and drawing the tape and strip through the container in the claimed manner.

#### *Allowable Subject Matter*

8. Claims 1-12 are allowed.

9. The following is an examiner's statement of reasons for allowance: None of the prior art cited or reviewed by the examiner teaches or fairly suggests the claimed provision of attaching the strip of material to the tape being substantially longer than the distance between the first and second slots and drawing the tape and strip through the container in the claimed manner.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

10. This application is in condition for allowance except for the following formal matters:  
the above mentioned objections to the abstract and specification and the presence of non-elected claims 13-20.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
